

Dear FCC Commissioners & Staff:

Dear FCC Commissioners & Staff,

I hope you will consider users like myself that depend on service that I receive from my independent Internet Service Provider, that was not available from Bell South.

I started DSL service from Bell South, which worked well, but they lacked providing service like UNIX access and the basic FTP that my longtime ISP, IGLOU provides. I had to switch from Bell South to IGLOU for this access that I had been using for years over the phone modem.

Thanks for your consideration.

Sincerely,

Earl L Albin
